

DeltaFlow Labs

Quantitative Research • Market Intelligence • Automation Infrastructure

DeltaFlow Labs is a technology initiative focused on developing market intelligence systems, quantitative research tools, and automation infrastructure for modern financial markets.

Our mission is to transform complex market behavior into structured intelligence through research, analytics, and scalable software systems.

Vision

We believe the future of financial technology lies in structured intelligence.

DeltaFlow Labs is building next-generation infrastructure that helps researchers, developers, and traders analyze market structure, validate ideas, and develop systematic decision-support solutions.

Core Projects

DeltaFlow Engine

Market structure intelligence framework designed to analyze:

- Swing Structure
- Break of Structure (BOS)
- Change of Character (CHoCH)
- Liquidity Events
- Trend Development
- Multi-Timeframe Analysis

Status: Active Development

ICT SMT Bot

Research platform focused on:

- SMT Divergence Detection
- Cross-Market Correlation Analysis
- Automated Monitoring
- Market Context Analytics

Status: Active Development

VEMB15 AUTO

Systematic execution research framework designed for:

- Rule-Based Strategy Deployment
- Risk Management Logic
- Backtesting Workflows
- Performance Evaluation

Status: Research & Development

NIFTYOPT

Options analytics and monitoring framework focused on:

- Market Observation
- Structured Analytics
- Options Data Monitoring
- Research Dashboards

Status: Research & Development

Technology Stack

- Python
 - MetaTrader 5
 - Streamlit
 - Cloudflare
 - AWS
 - GitHub
 - Real-Time Data Processing
 - Quantitative Analytics
-

Development Roadmap

Phase 1

- Market Structure Engine
- SMT Detection Framework
- Research Dashboard
- Real-Time Data Integration

Phase 2

- Advanced Analytics
- Backtesting Infrastructure
- Multi-Strategy Framework

Phase 3

- AI-Assisted Market Intelligence
- Portfolio Analytics
- Cloud-Native Research Platform

Current Status

DeltaFlow Labs is currently in active development.

The project focuses on building market intelligence infrastructure, quantitative research systems, and automation frameworks for financial market analysis.
